

IoT Steering Committee Minutes

March 28, 2022

Agenda

Agenda Topics	Moderator	Minutes
Adopt the minutes of the February 28, 2022 call	Frédéric	5
EclipseCon 2022	Frédéric	5
2022 IoT and Edge Developer and Adoption Survey	Hassan	10
Internship program	Frédéric	5
The Edge of Things — Publication on Medium	Hassan	15

Attendees

Present

Robert Andres — Eurotech (alternate)
Caroline Buck — Bosch
Frédéric Desbiens — Eclipse Foundation
Hassan Jaber — Eclipse Foundation
Jens Reimann — Red Hat
Ishu Verma — Red Hat (marketing committee)
Giuliana Vidoni — Eurotech (marketing committee)

Absent

Marco Carrer — Eurotech
Anita Bunk — Bosch (marketing committee)

1. Adopt the minutes of the February 28, 2022 call

The committee approved the minutes unanimously.

2. EclipseCon 2022

Frédéric Desbiens informed the members of the committee that EclipseCon is going back to an in-person format for 2022. The conference will take place in Ludwigsburg, Germany from October 24 to October 27. Community Day will take place on the first day, as usual. Thursday afternoon will be reserved for hackathons. There will be again an IoT and Edge track. The call for papers is expected to open around mid-April.

3. 2022 IoT and Edge Developer and Adoption Survey

Hassan Jaber shared the latest details about the 2022 edition of the survey. It launched silently on March 15 and active promotion will start in early April, to avoid creating confusion with the Jakarta EE Developer survey. The IoT and Edge Developer and Adoption survey will run until mid-June, with two separate reports published in the second half of the year.

4. Internship program

Frédéric Desbiens announced to the committee that no organization made financial commitments regarding the internship program. If no funding is confirmed by the end of April, the Foundation will not be able to hire an intern for the Fall 2022 semester.

Robert Andres stated that he is still working to secure a commitment from his organization, but is unsure of the timeframe. Frédéric Desbiens confirmed that it could be possible to hire an intern for the Winter 2023 semester if funding is secured by early September.

5. The Edge of Things — Publication on Medium

Hassan Jaber shared information about [The Edge of Things](#), a publication of the Eclipse Foundation on Medium.com. The initiative was proposed by the steering committee of the Edge Native working group. The name was chosen to build on the recognition of our successful series of webinars.

Representatives from leader members of the Eclipse IoT working group are welcome to propose content for the publication, which is focused on IoT and Edge Computing topics. To do so, authors just need a free medium.com account.

Some of the content on Medium.com requires a paid subscription. This will not be a requirement to access The Edge of Things.
