

IoT Developer Survey

April 2015

Survey Introduction

The Eclipse IoT Working Group solicited feedback for the IoT Developer Survey. The intent of the survey is to better understand the trends and attitudes toward developing IoT solutions.

The survey was opened for input on February 9, 2015 and closed March 26, 2015. A total of 394 individuals responded to the survey but 38 were disqualified due to lack of experience in IoT. The survey was promoted through a variety of channels, including Eclipse Foundation social media and web sites, Eclipse IoT WG member promotions to their communities, various IoT Meetups, and other IoT organizations (OMA, OASIS, IIC).

The results of this survey have inherit biases due to the sample communities involved. The results should be viewed as one data point and snapshot of the IoT developer community.

Key Findings

- Developers are engaged with IoT: 33% of respondent are building IoT solutions today. Over 50% are in learning and discover mode.
- Top 3 Influencers of IoT Technology: 1) Hardware vendors, 2) Semi-conductor manufacturers and 3) Cloud Providers
- IoT Leaders: Intel, Google, Cisco, IBM, and Bosch
- Important IoT Consortiums: Eclipse IoT, IEEE, IETF

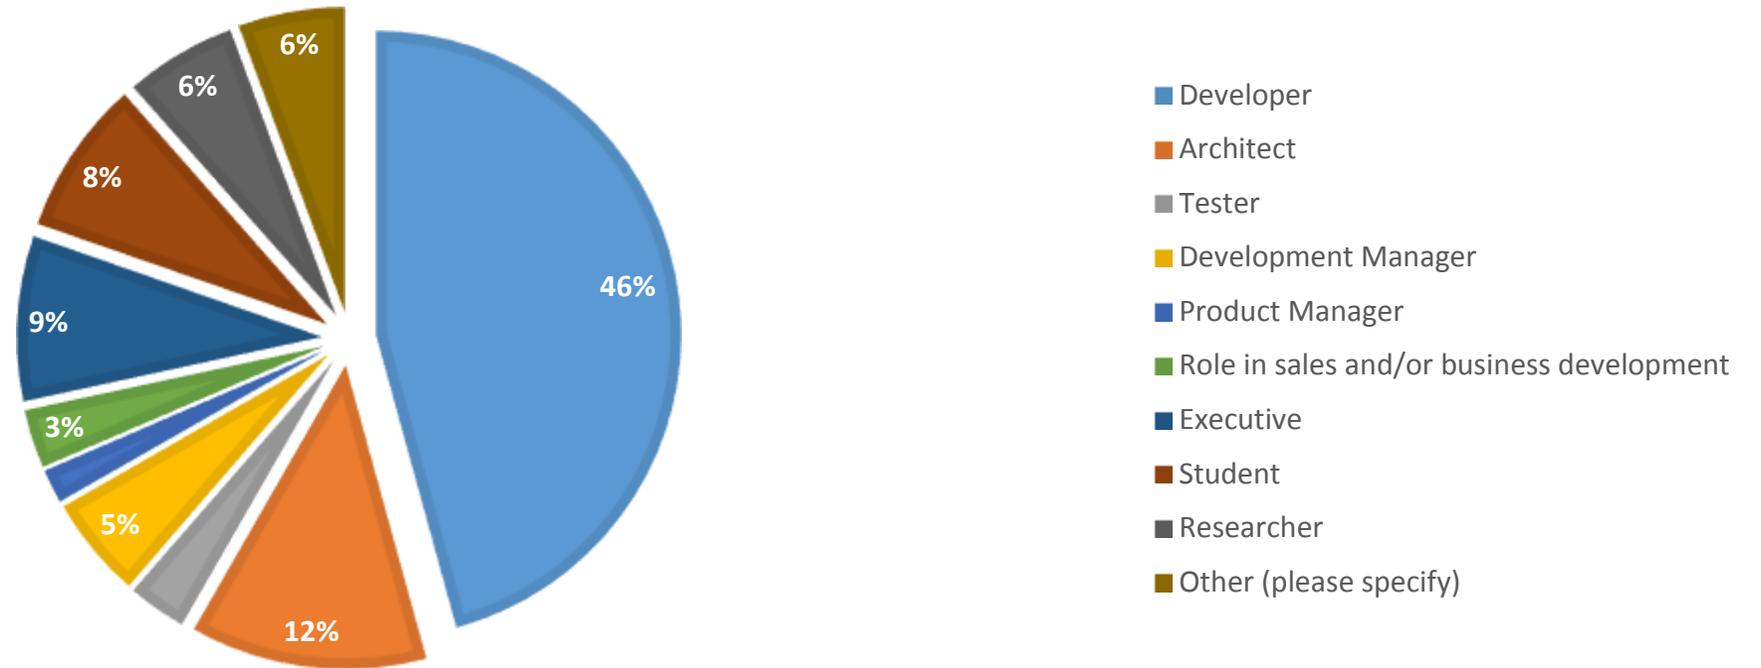

Key Findings

- Top 3 IoT Concerns: Security, Interoperability and Hardware Integration
- Open Source Is Pervasive in IoT: 81% claim open source is used for IoT solutions
- Key IoT Technology: HTTP and MQTT for messaging, Linux for OS
- Top 3 IoT languages: Java, C, JavaScript

Who responded to the survey?

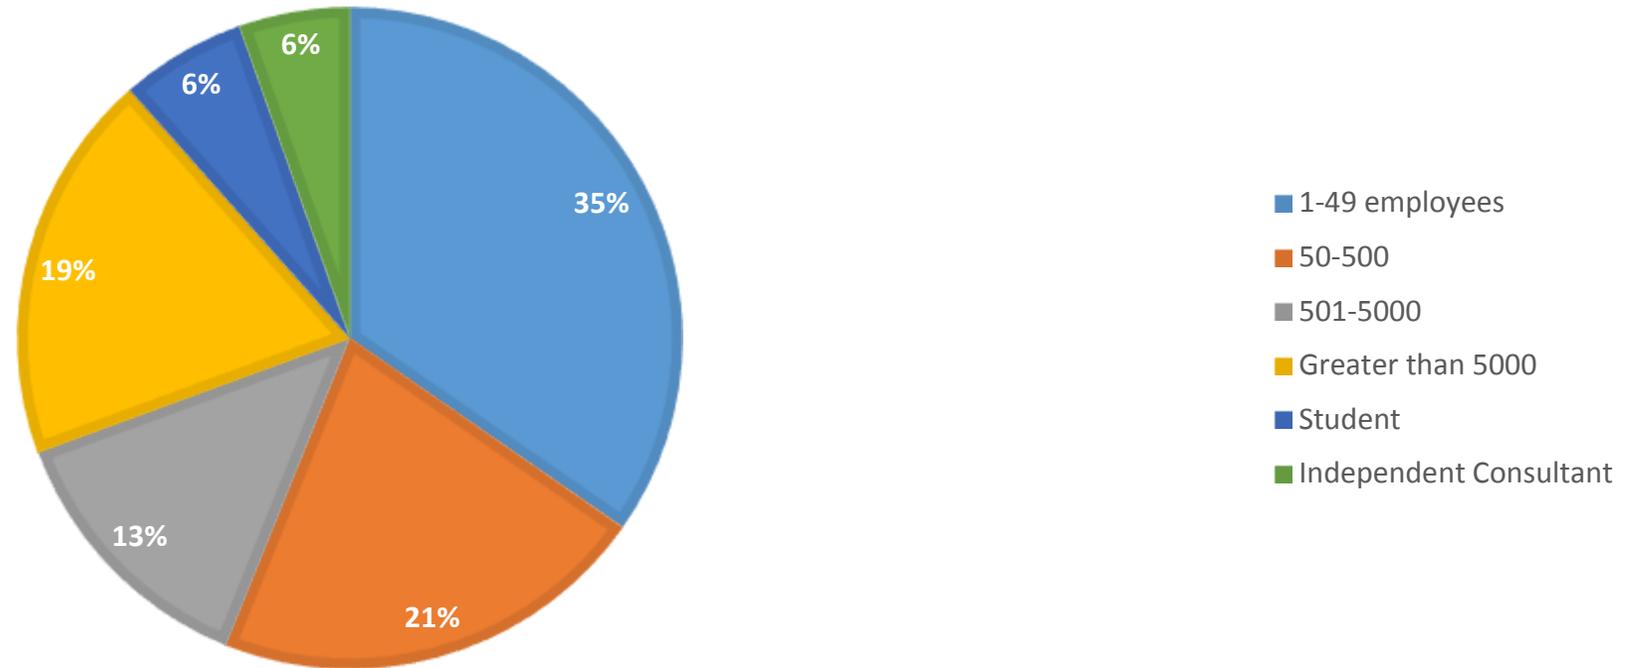

Role

WHAT IS YOUR JOB TITLE?

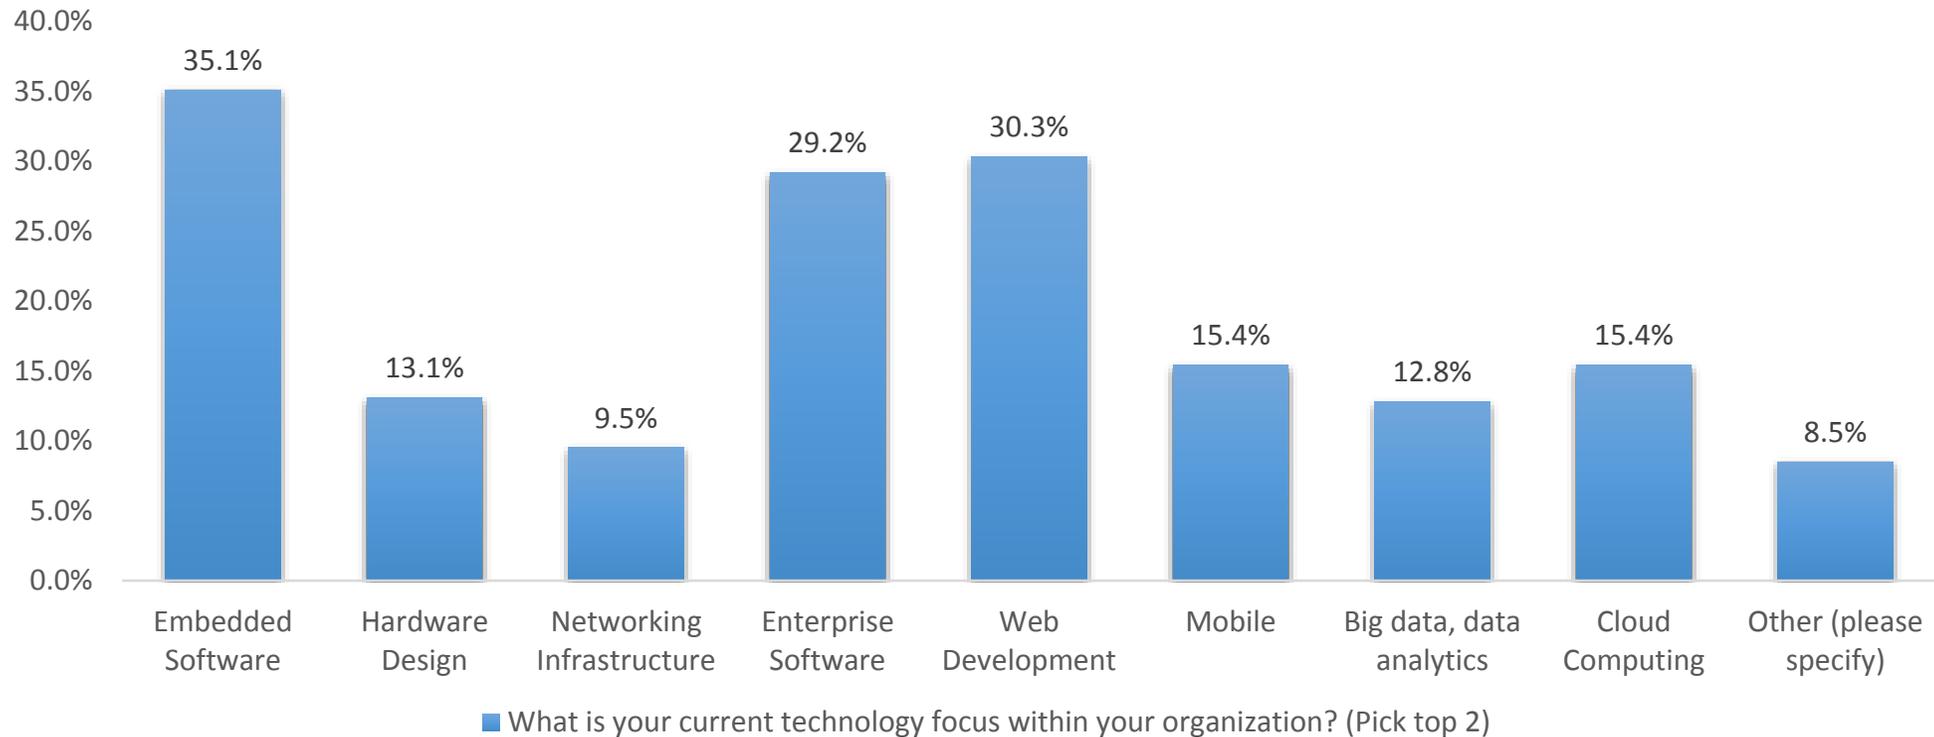

Organization Size

HOW MANY EMPLOYEES ARE THE ORGANIZATION YOU WORK FOR?

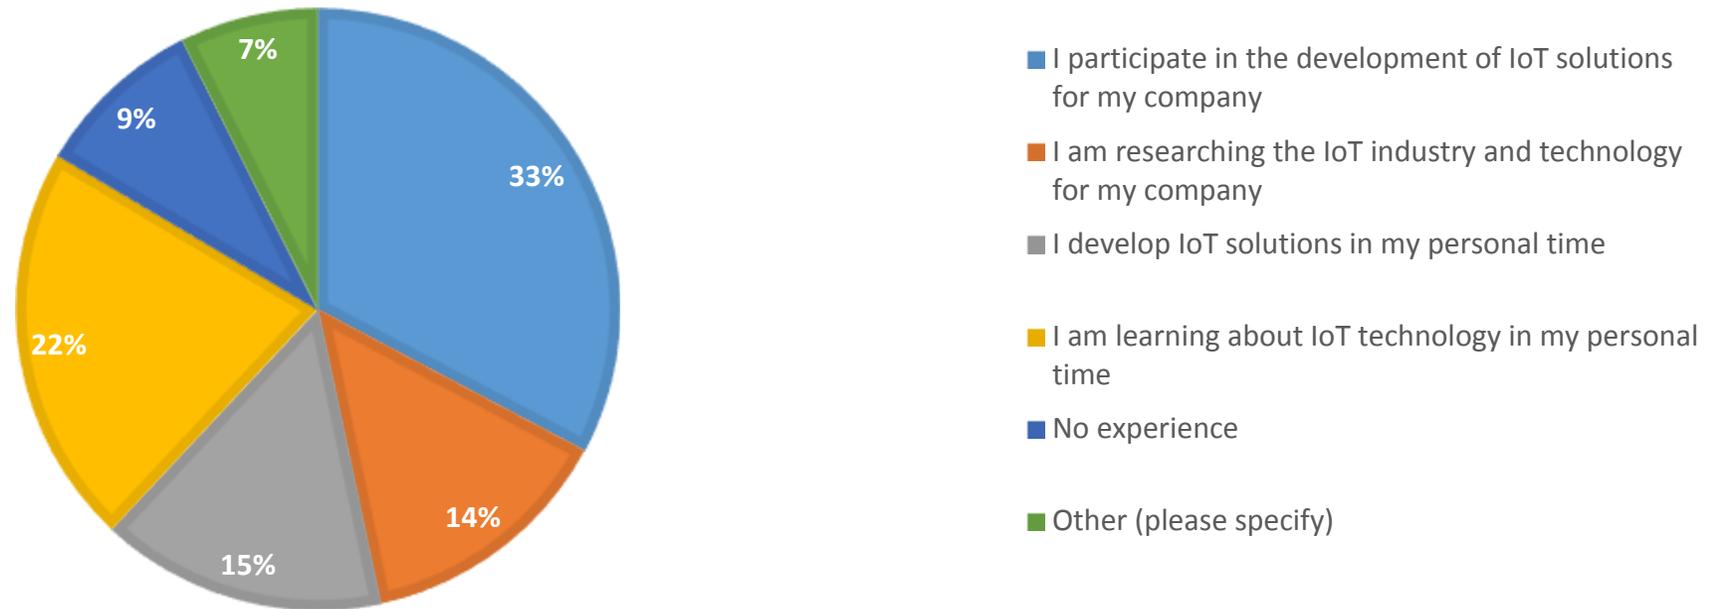

Current Technology Focus

Individual Experience with IoT

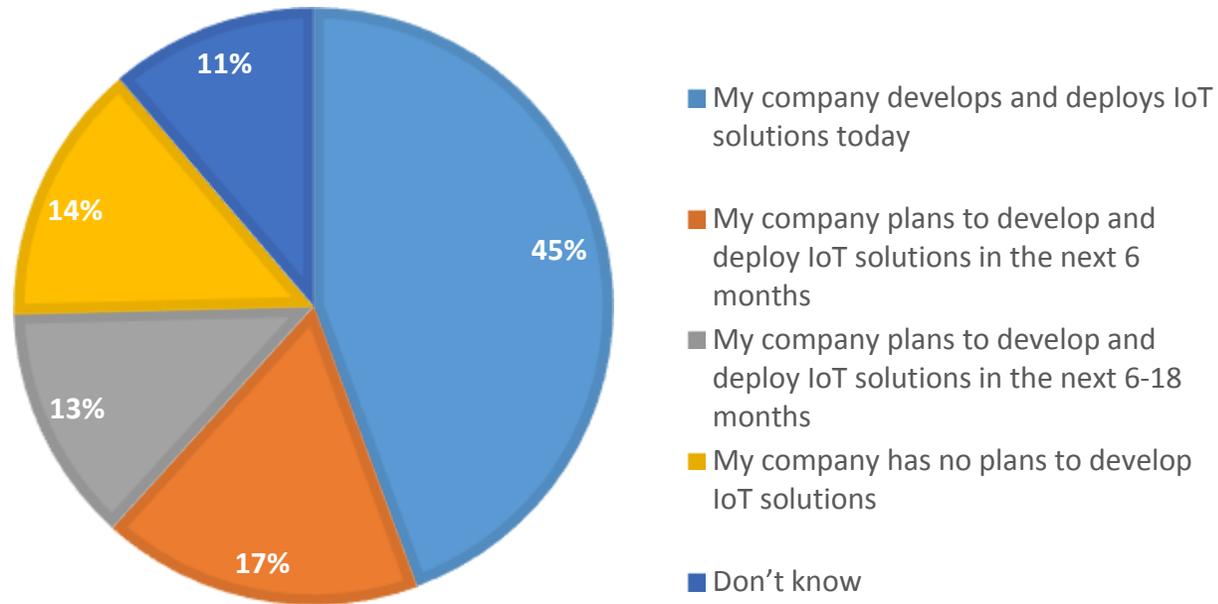

WHAT IS YOUR EXPERIENCE BUILDING IOT SOLUTIONS?

IoT Experience

Organization Plans for IoT

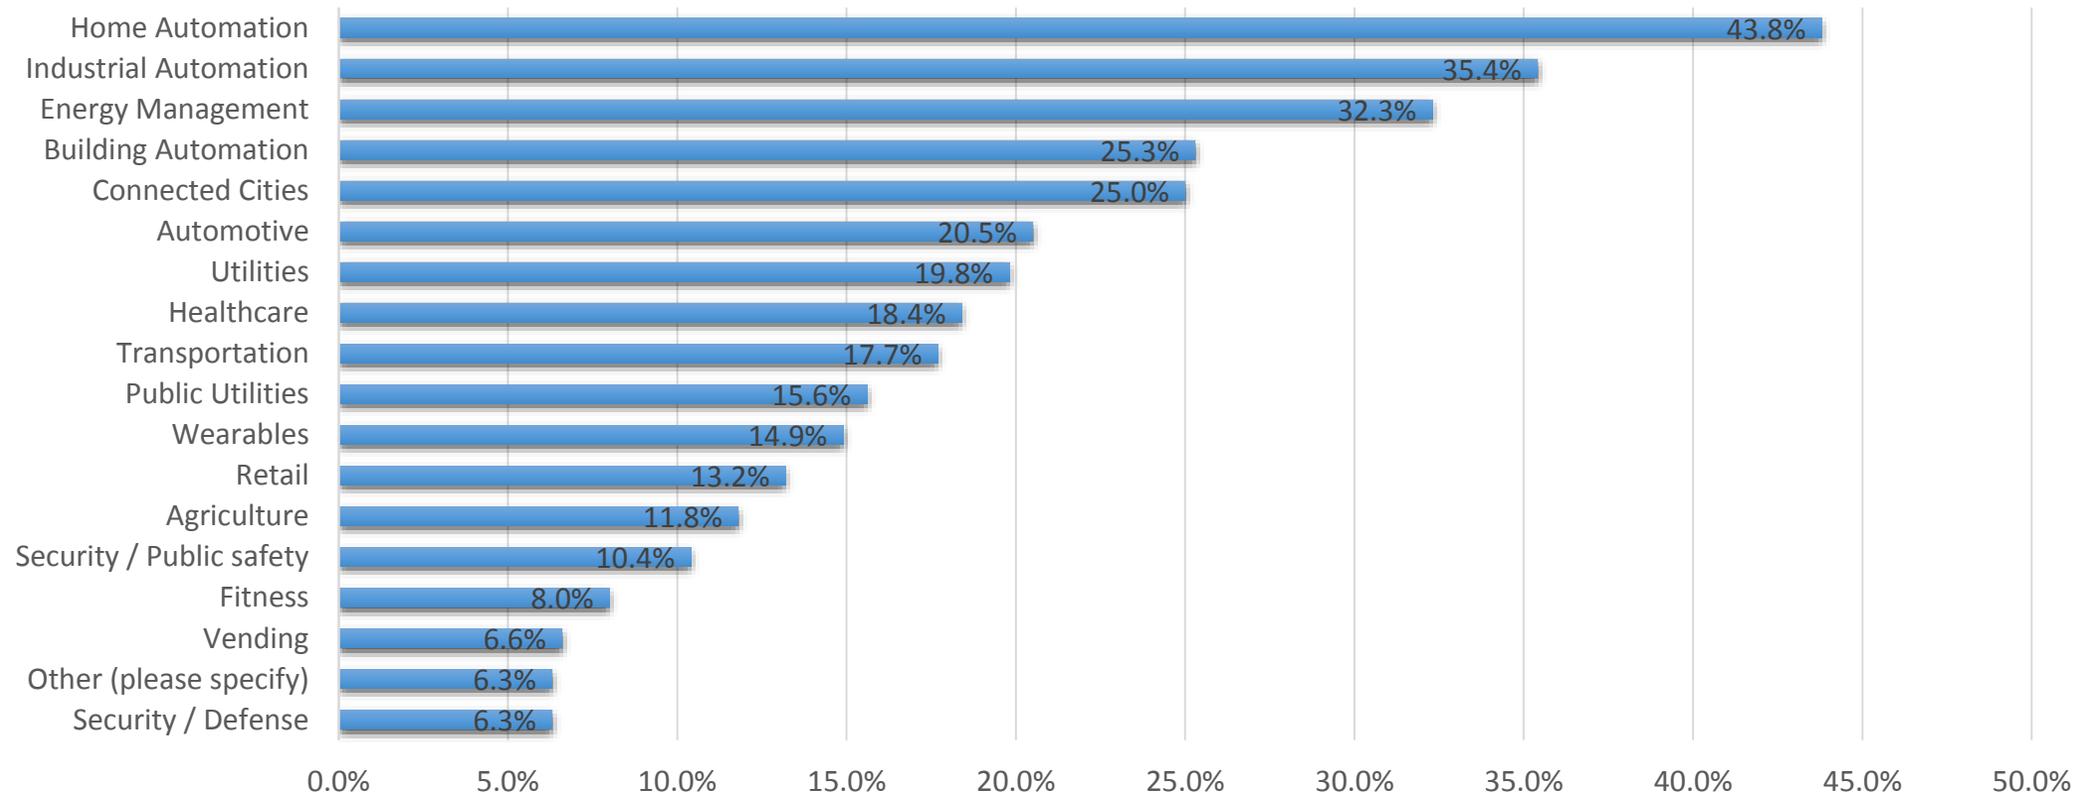

WHAT IS YOUR COMPANY'S PLAN FOR IOT SOLUTIONS?

If respondent has a Embedded Software focus, deploys IoT solution today jumps to 53%, Enterprise Software (35%) and Web Dev (31%)

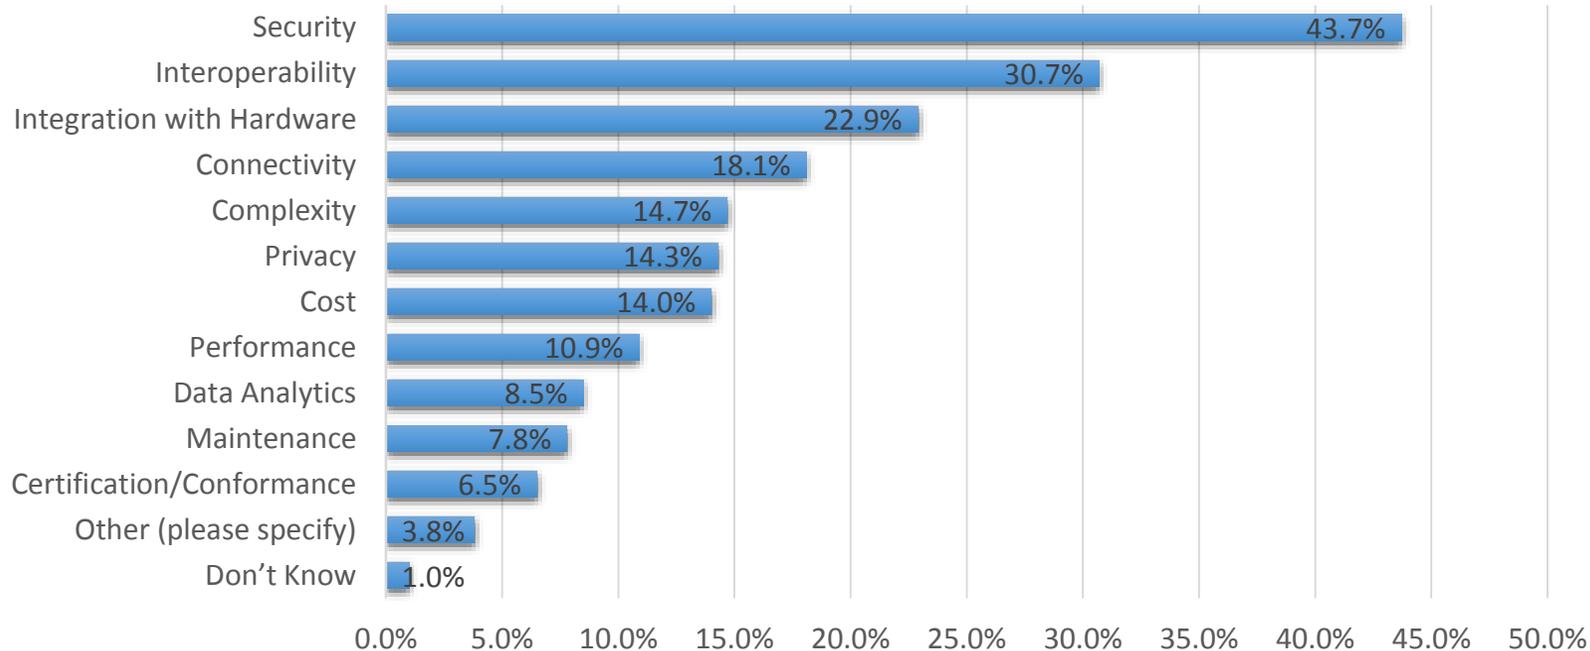

If respondent has Enterprise Software focus, no plans to develop IoT solutions jumps to 32%

Solution Area

Key Concerns for IoT

What are the top 2 concerns for developing IoT solutions? (Pick 2)

If respondent has Enterprise Software focus, Interoperability more of a concern (39%), vs Embedded (27%) and Web (21%)

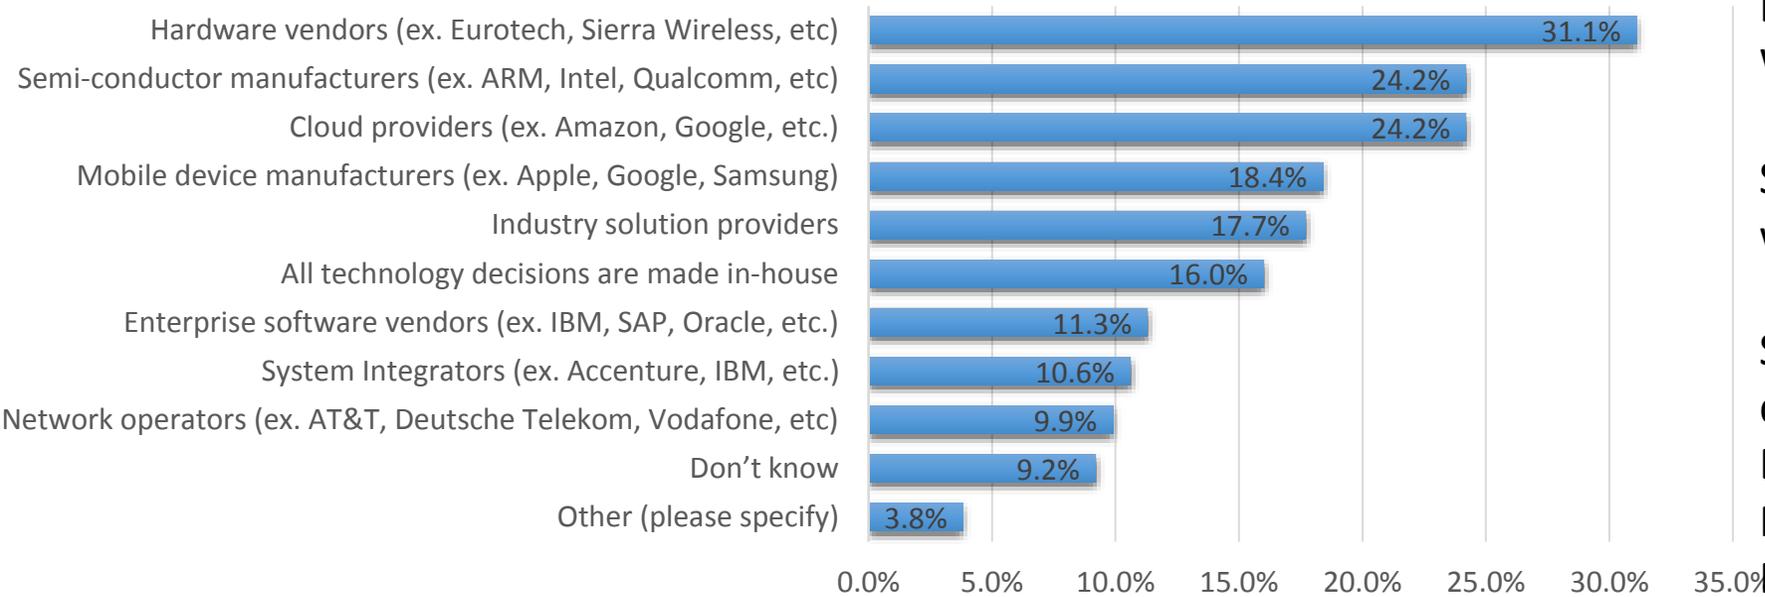

If respondent has Embedded Software focus, Connectivity more important (26%)

If company deploys IoT solution today, Connectivity becomes more of a concern (25%)

Security more of a concern for companies planning to deploy in 6-18 months (60.5%)

Technology Influencers

What type of vendors will have the most influence in selecting IoT technology? (Pick 2)

Semi-conductor influence depends on technology focus:

Embedded Software: 35%

Enterprise Software: 13%

Web Development: 14%

Solution providers more influential with Enterprise Software focus (25%)

Semi-conductor influence depends on deployment stage:

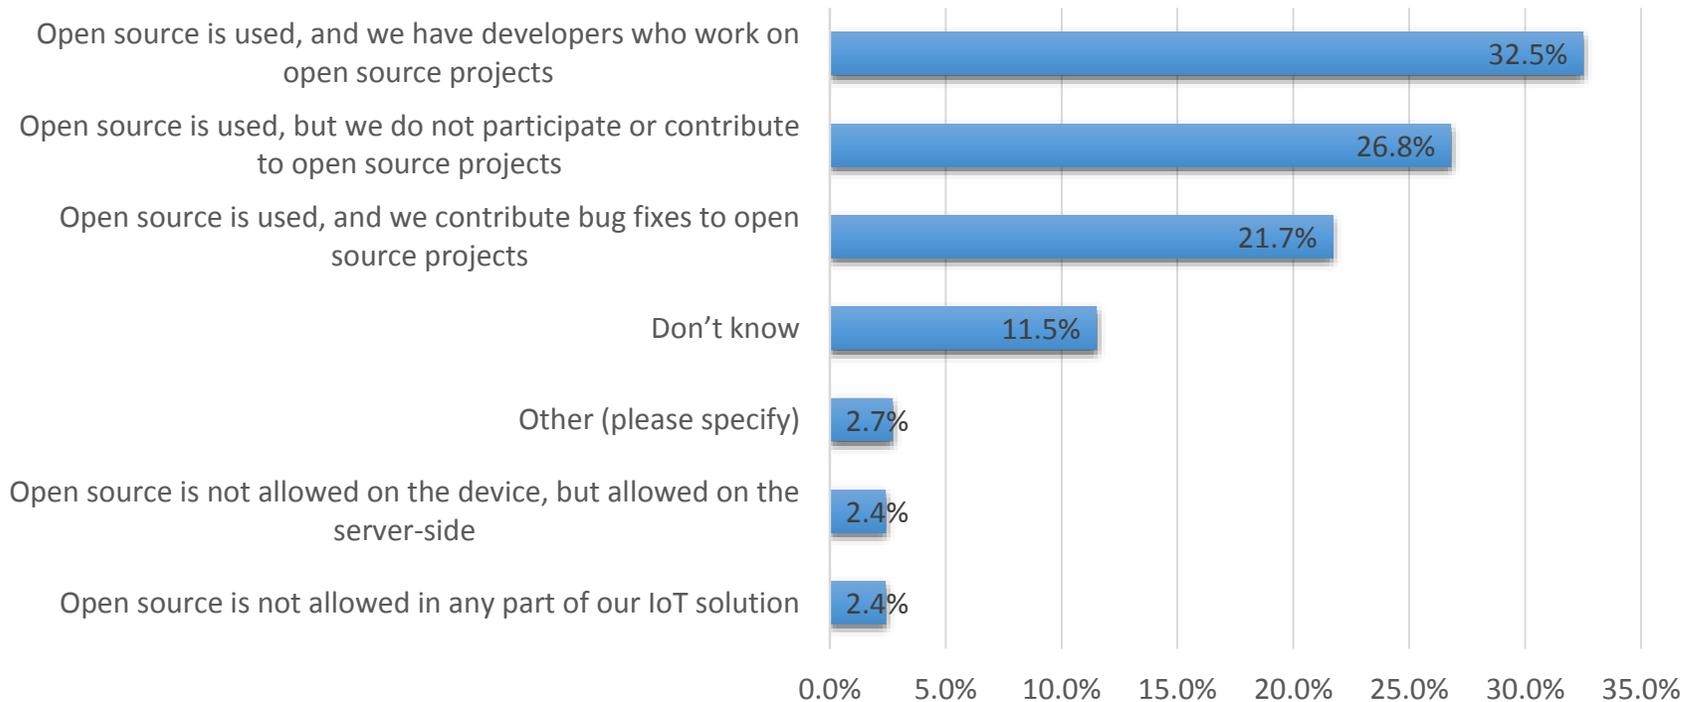

Deploy today: 21.5%

Plan in 6 months: 27.5%

Plan in 8-18 months: 39.5%

Open Source Policy

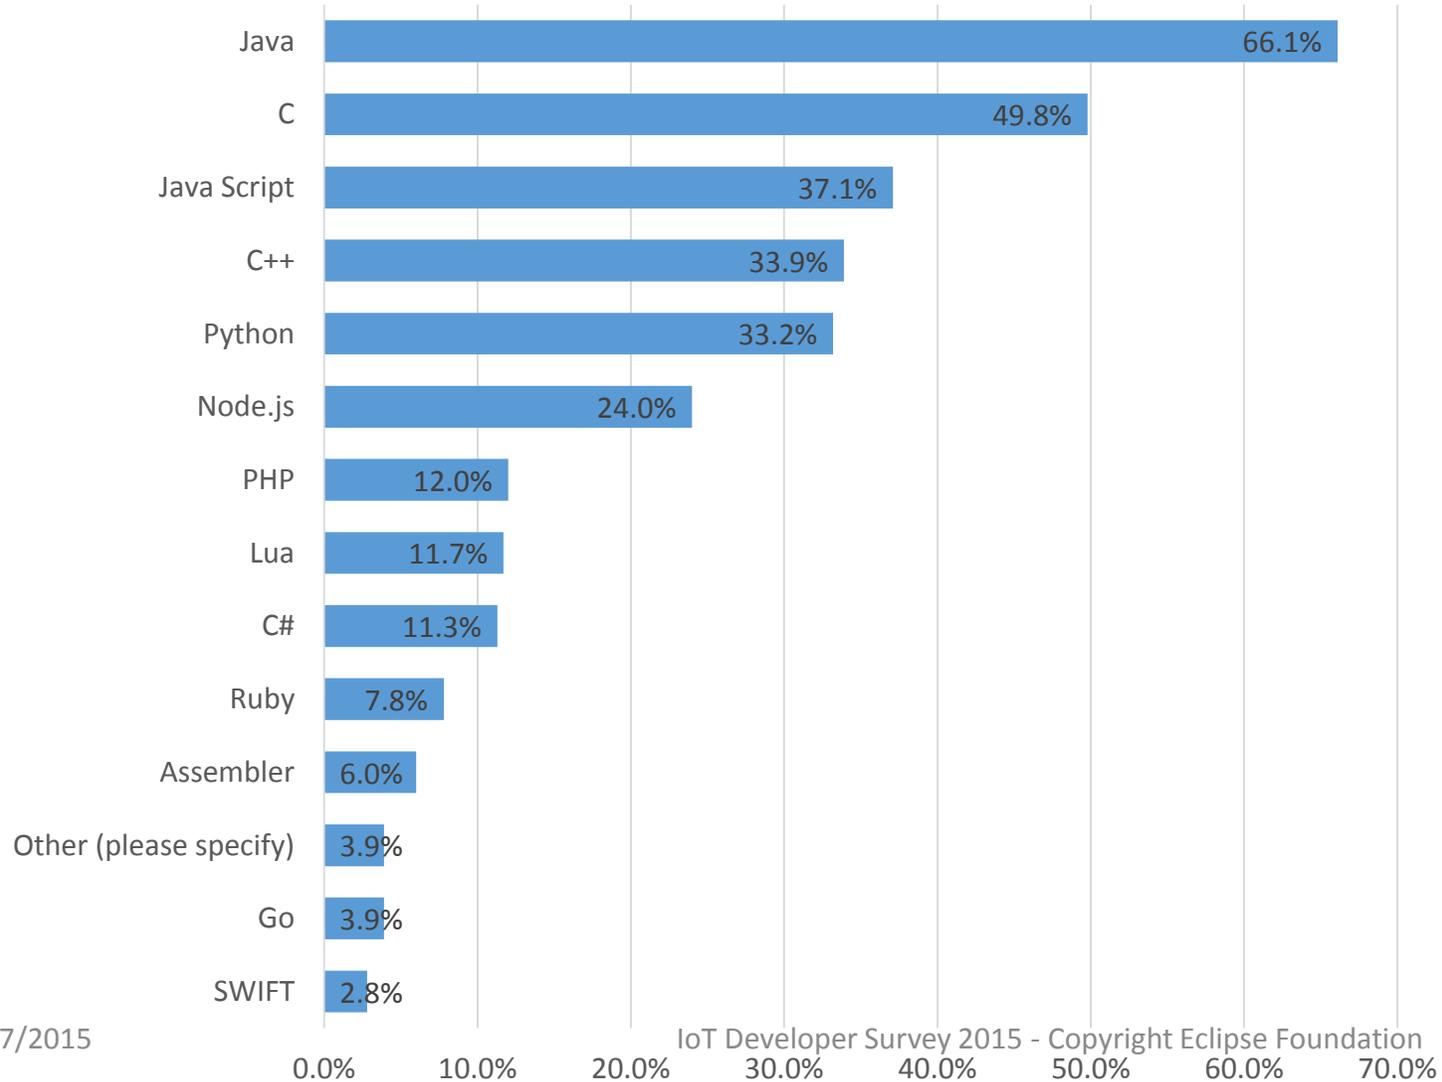

What is your company's policy about using open source technology in IoT solutions?

Open source is used and developer work on project depends on company deployment stage:
Deployed today: 50%
In 6 months: 27.5%
In 6-18 months: 10.5%

Technology Used

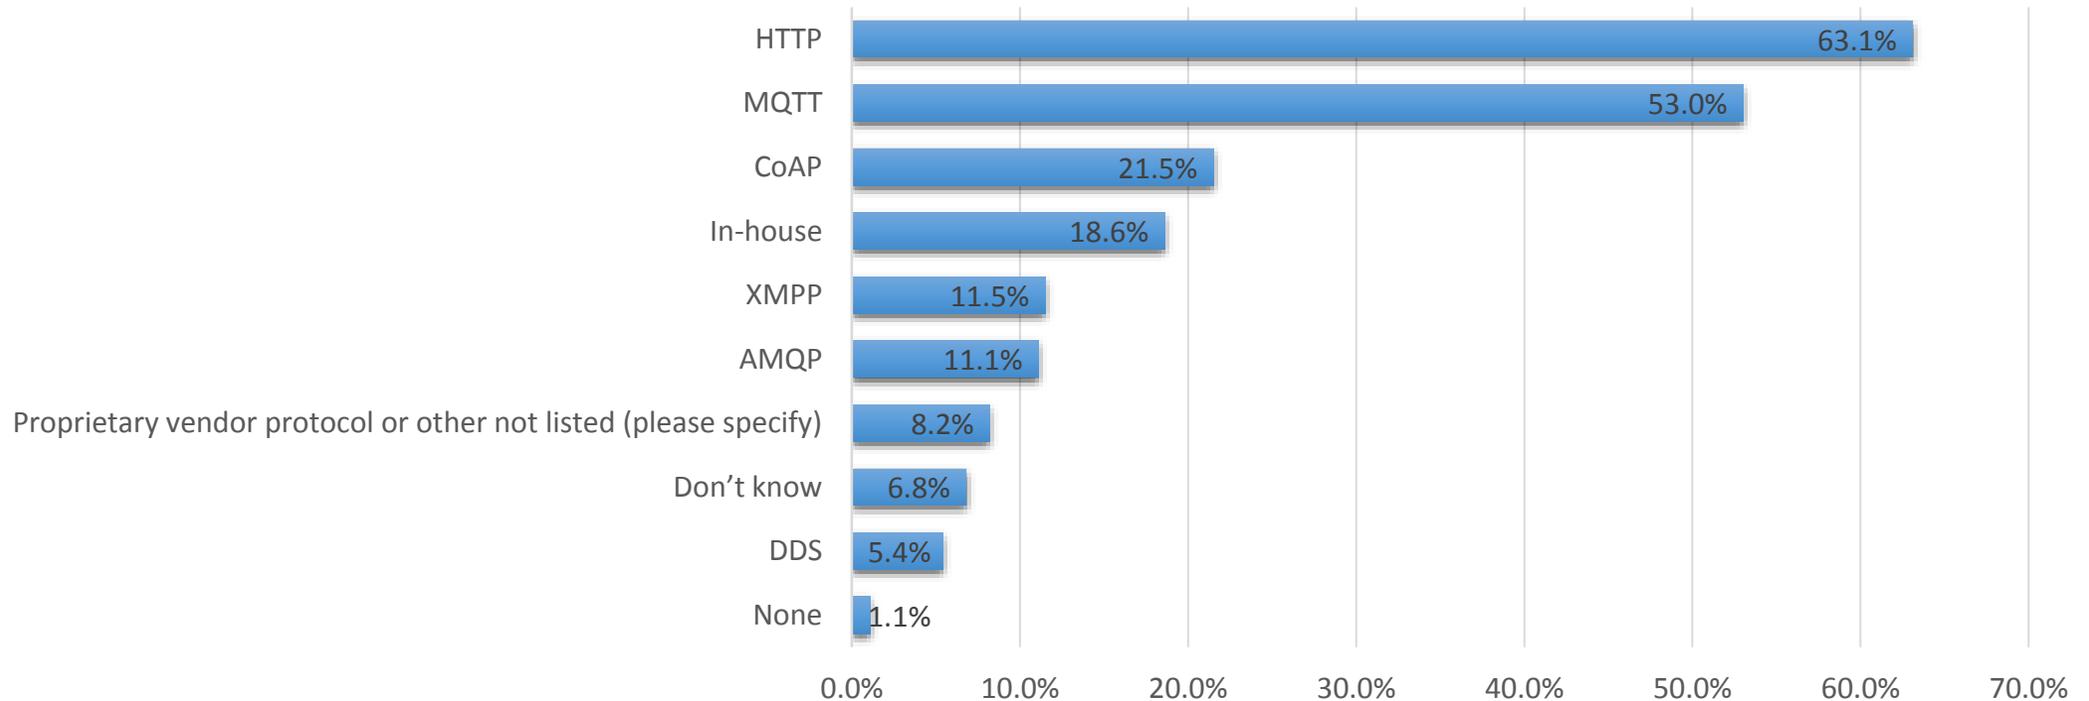

Programming Languages

For Embedded Software developers
C is #1 language (64%) and then Java
(58%)

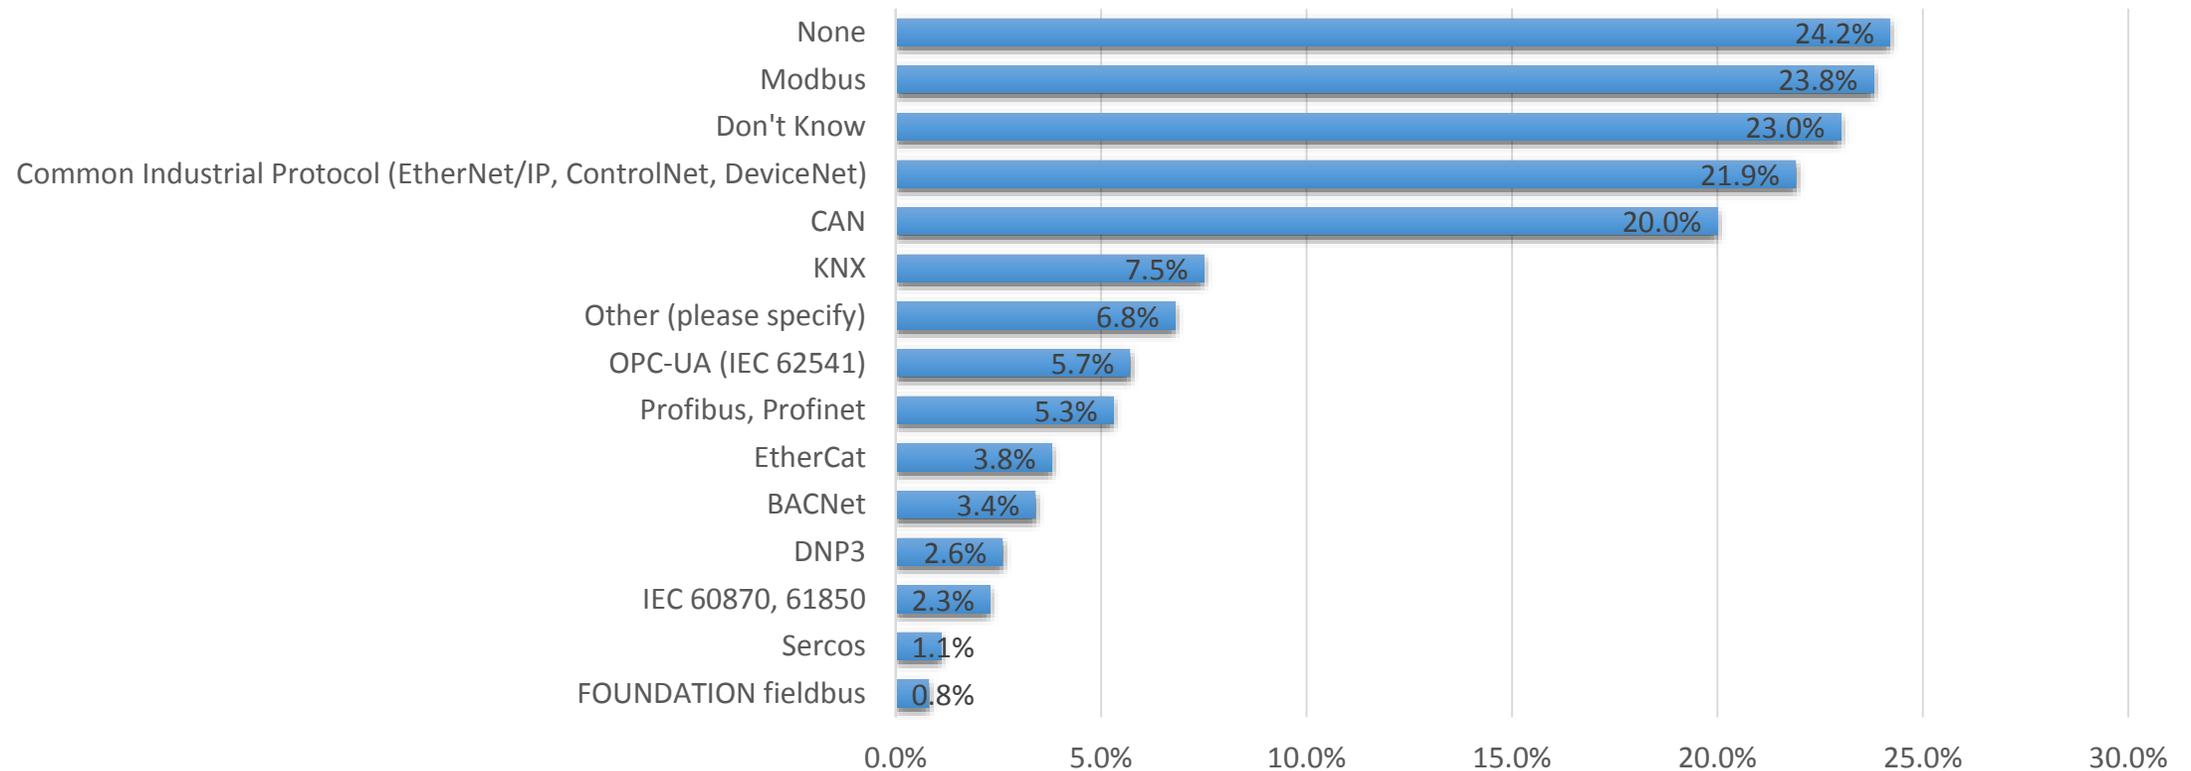

Messaging Protocol

What general messaging protocols do you use in your IoT solution?

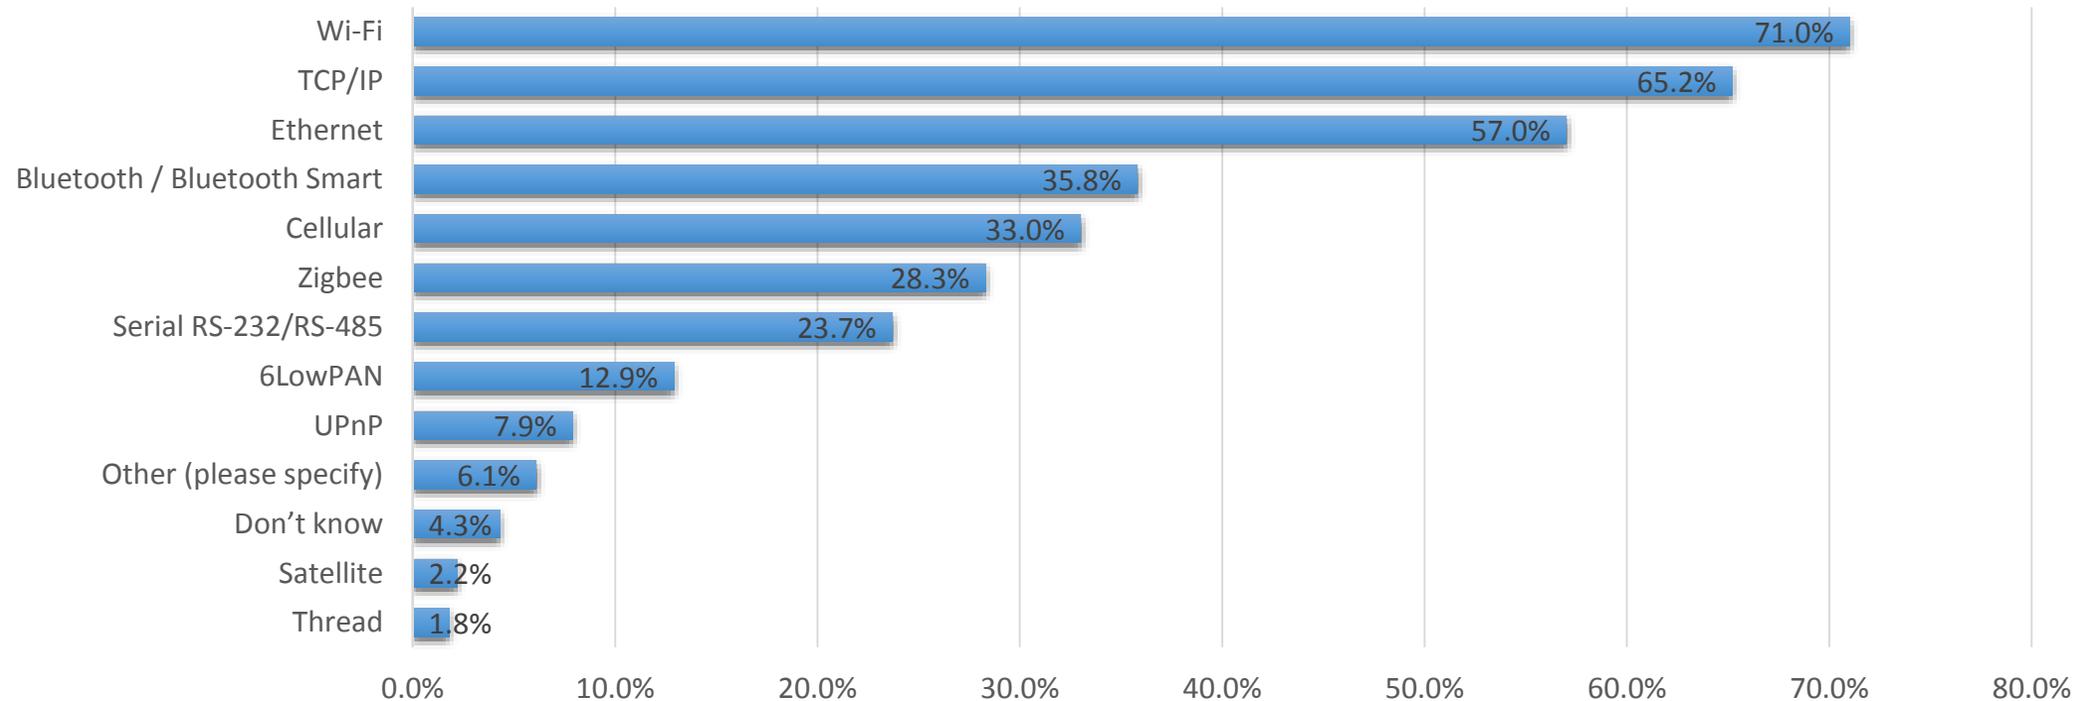

Industrial Protocols

Which industrial protocols do you use in your IoT solution?

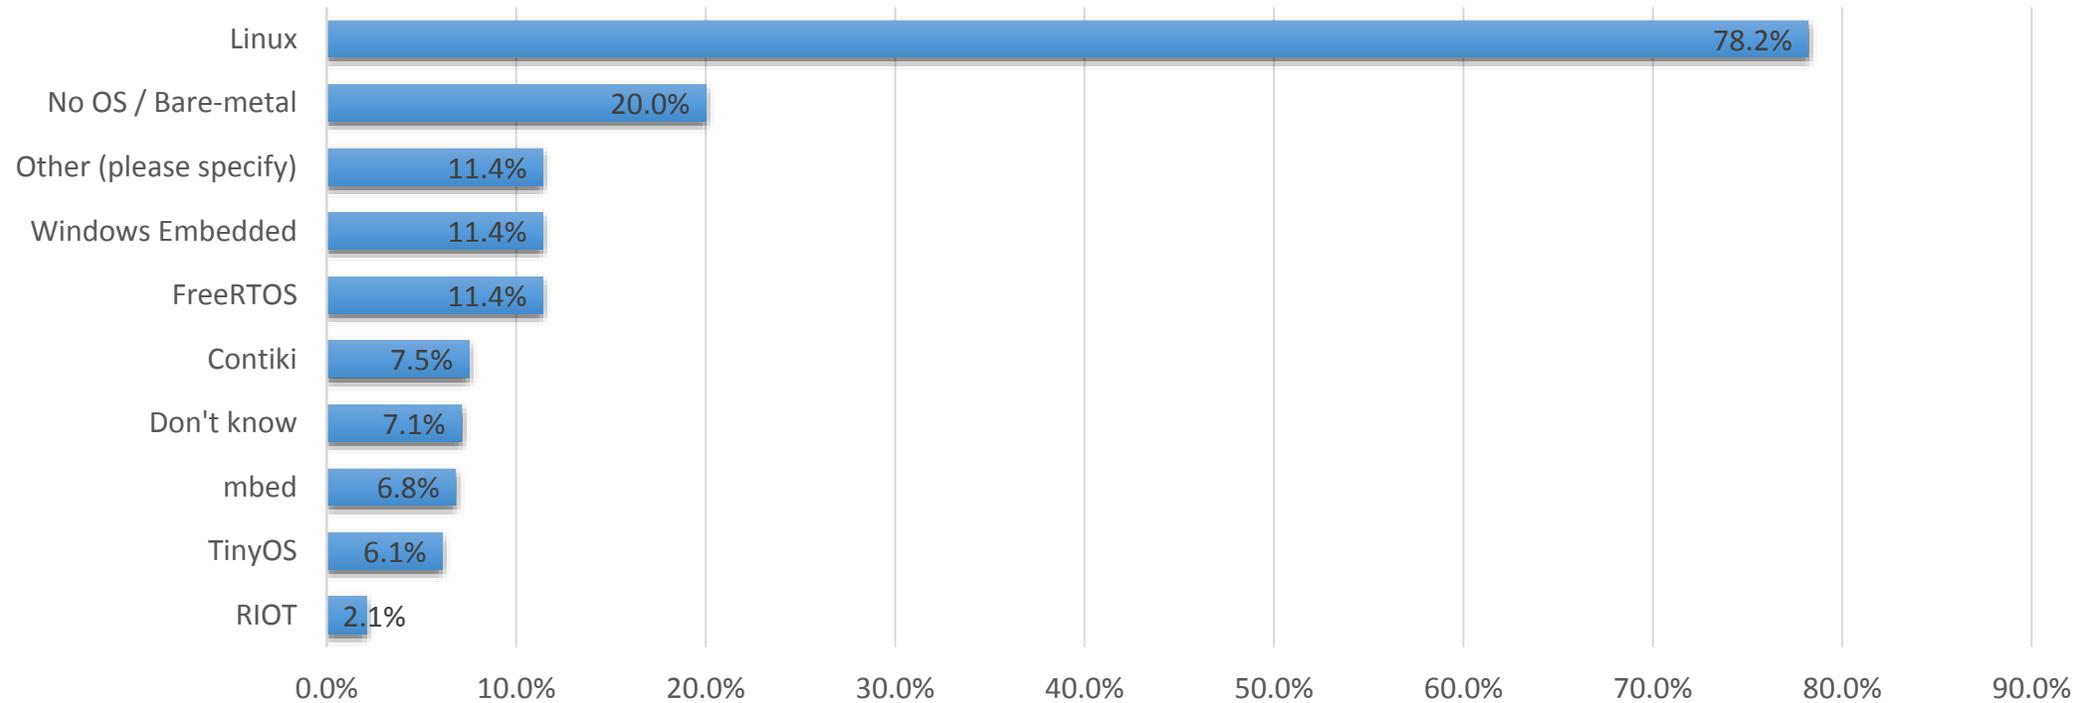

Connectivity

What connectivity protocol(s) do you use in your IoT solution?

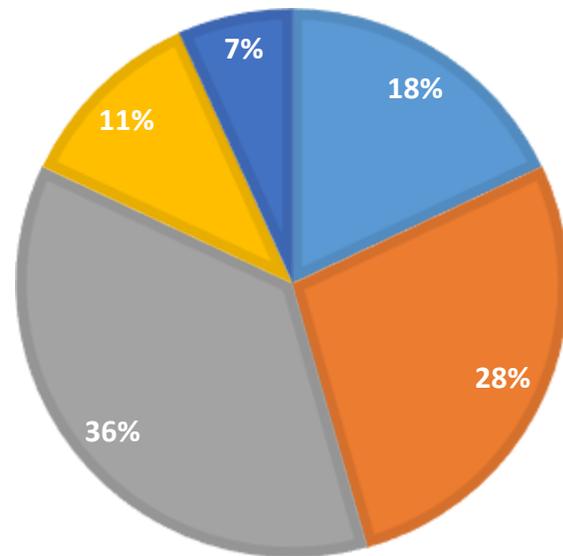

Operating System

Which operating systems do you use for your IoT devices?

Accessible Hardware

HAVE YOU EVER USED ANY ACCESSIBLE HARDWARE PLATFORMS LIKE RASPBERRY PI, ARDUINO, BEAGLEBONE, ETC. ?

- Yes, my company deploys IoT solution using an accessible hardware platform.
- Yes, my company prototypes IoT solutions using an accessible hardware platform.
- Yes, I have experimented with accessible hardware in my spare time
- No, but I intent to experiment with accessible hardware in the next 6 months.
- Never used open hardware.

IoT Consortia

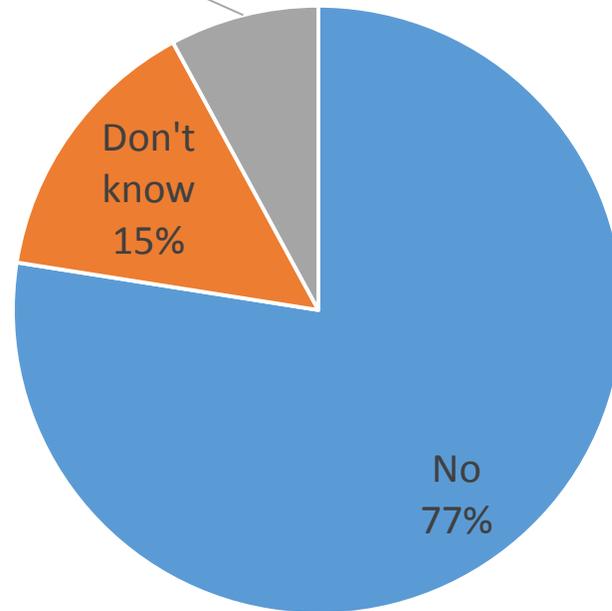

How would you rank your organization's perceived importance of the following IoT Consortia to your IoT solutions?

	Very Important	Important	Neutral	Not Applicable	Never heard of them	Rating Average
AllSeen Alliance	9	37	69	15	100	3.70
Eclipse IoT	77	93	58	8	20	2.22
IEC	15	30	92	23	64	3.41
IEEE	46	61	105	18	10	2.52
IETF	34	61	79	19	43	2.90
Industrial Internet Consortium (IIC)	21	42	81	15	72	3.32
OASIS	27	50	91	18	56	3.11
Open Interconnect Consortium (OIC)	11	32	80	16	94	3.64
OMA	13	38	74	20	85	3.55
OneM2M	19	42	63	17	92	3.52
Thread	7	29	78	13	93	3.71

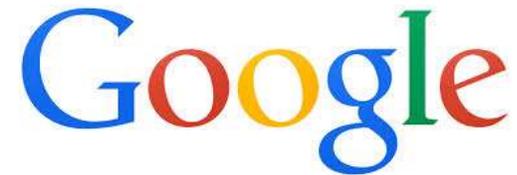

Partner Programs

Do you participate in any IoT partner program sponsored by a vendor? If so which ones? (ex. Work at Nest, Intel IoT Solutions Alliance, Apple Homekit)

Yes. Please specify the programs
8%

Top 5 IoT Corporate Leaders

What company or companies do you see as being leaders in IoT?
